Hi everyone on this video i'm going to be talking about the tips on how not to be hacked. If you haven't listened to my story please go back to the previous video in the description down below.

Tip number one is:

1. Don't give them any personal information on your profile
   If any user would tell you to do something you want them to do my suggestion would be never reply to them. They'll steal your account permanently.

Now, tip number two:

2. Do not change your email whatsoever they can steal your personal information (bio)
   Whatever you do, don't change your email because hackers can get into your account without you even knowing if it is you or not.

Before I say tip number three, I know it might sound over-detailed and rhetorical, but please bear with me.

3. If you find any suspicious messages on any social media platform my only suggestion is just **ignore/block/report** them as they will probably ask you to do something unexpected
   Hackers can basically ruin your day no matter what they do to take advantage of you. It's better just once if they continue to do this action you'll have three options: ignore/block/report.

4. If you find suspicious photos or stories report it immediately. Avoid clickbait!
   Whatever you see that is something is not right or shouldn't be posted you have to report it right away.

5. Report the hacker/scammers or blocked/report them immediately
   If you know the user who does any suspicious activity you must report them.

6. If these hackers/scammers want you to do something just don't do it. It's your account and take action to protect yourself and your account.
   If these hackers/scammers ask you to do something you can either don't answer them at all they will still take advantage of you.

7. Don't offer them money they're only using to expose you
   Whenever these users ask you for money just say no. They are imposters, trying to impersonate you. Don't give into their demands.

   That wraps up on tips, on how not to be hacked. If you think i'm missing something put a comment down below. Again thank you for watching this video.
